

ACCESSORIES

Flush vision panel

The vision panel system can be installed on modular partitions, masonry walls or doors with the benefit of guaranteeing flush finished surface. Standard dimensions for vision panel are 1000x900x63mm and 500x800x45mm for doors. Sizes can vary according to requirements. All vision panels are equipped with 6/7 SGG® Stadip double safety glass, AISI 304 stainless steel internal spacer and are sealed with silicone as standard.

The OC srl vision panel system is fitted with an auto-locking flap system for reduced installation times and maintenance operations.

Transfer hatch

Made from stainless steel or HPL with polycarbonate. Transfer hatches are suitable to be used in a controlled contamination environment in order to decontaminate the surfaces of materials entering and exiting the cleanroom.

They can be fitted to operate with filtered air, UV lamps and can be suitable for VHP (Vaporized Hydrogen Peroxide) treatment as required.

Air shower

Modular self-contained boxes equipped with air nozzles blowing high pressure air to decontaminate materials or personnel moving in and out the cleanroom.

The air shower can be fitted with HEPA filters if required along with interlock system in order to guarantee operating procedures in a given environment.

Accessories

Step over bench

Step over bench can be built with tubular stainless steel frame covered with AISI 304 stainless steel sheet shiny or satin-finished, open or closed frame design, smooth angles and adjustable feet or bolt down flanges.

LOCKERS – the following descriptions are purely indicative as lockers can be manufactured according to specific size and configuration requirements.

Personnel locker units

The locker can be made of stainless steel, pre-coated steel or HPL, and fitted with adjustable shelves, aeration grilles, clothes hanger bar, umbrella stand with dripper tray, flat or slanting top, and filtered air system thus giving a number of possible configuration. The lockers can be integrated into the partition wall systems or can be self-standing according to the environment but always guaranteeing fully flush surfaces and easy cleaning operations.

Storage lockers

These lockers are specifically designed to be used where the highest environmental standards are required. Made completely of AISI 304 stainless steel with smooth angles and edges they can be fitted with adjustable shelves for cleanroom garments, booties, gloves etc. Door leaf with tilting top for disposal bin, HEPA filter/blower unit and flat or slanting tops are also available.

Accessories

OFFICINECECCACCI

Hand rail and bumpers

Stainless Steel pipes and fitted with special plates for a clean fixing solution on floors and walls.

Stainless steel coverings

Bespoke solution for flush connections made of stainless steel sheet between specialist machines, wall and floor abutments to negate spaces where dust and filth can accumulate. All making the cleaning operation easier.

Coving

Radial stainless steel or anodised coving for floor and wall abutments in accordance with standard pharmaceutical practice.

Stainless steel boxes and boards for utilities

These custom accessories are made of AISI 304 stainless steel to individual design specification avoiding voids where dust and filth can accumulate and make the general cleaning operation easier to the end user.

Aeration Grills

Grilles are made of AISI 304 stainless steel and once installed on modular partition walls guaranteeing a flush surface finish.

Stainless steel frames guarantee clean finishing and grilles can be fitted with filter-box according to the air-conditioning system requirements.

Anodised extruded aluminium natural colour or painted grilles for walls, doors and lockers are also available.

OC s.r.l. History

OC s.r.l. started its activities in the early 60's as a craftsmanship carpentry workshop making its skills and expertise available to the growing pharmaceutical industry district in Latina province, Italy, over the past 40 years.

Specific doors and partitioning walls designing and materials selection were developed in order to fulfill Clients' high standards and requirements.

Today OC s.r.l. is a leading company for the design, construction and installation of modular partition walls, doors, furniture and accessories for clean room and controlled environments.

OC s.r.l. designers provide ad hoc and flexible solutions to Clients, always ensuring the products quality starting from the raw materials selection to manufacture, installation and post sale assistance.

The exclusive patented hook-up system with the CH60 locking key allows very fast installation and removal of modular walls and doors. Simply acting on the blocking keys of the interested modules the size and extent of intervention will be held back too.

OC s.r.l. many years' manufacturing experience allows a scale production which does not compromise the artisan quality of each single piece assembled in its workshop. The same attention to details is paid during installation and maintenance operation as the highly skilled personnel employed always aims at an excellent product delivery.

OC s.r.l. has made quality its guiding principle in products and services development as well as on research of more performing materials. All OC s.r.l. products are made of recyclable materials. OC Srl is an ISO 9001:2008 certified company.

ACCESSORIES

The skills in metal and HPL workmanship and the experiences acquired through the solutions offered to our clients has made it possible to design and produce a number of accessories and products with specifications that perfectly fulfill the controlled cleanroom environmental required standards.

Our designers and workshop services offer our clients flexibility and versatility to choose from standard production or bespoke designing and realisation.

OC s.r.l. products are currently in use at the following sites:

Bristol Myers Squibb (Sermoneta (LT), Anagni(FR) - Italy), ABBOTT (Campoverde (LT) - Italy), IRBM (Pomezia "Roma" - Italy), JANSSEN CILAG (Latina - Italy), JANSSEN PHARMACEUTICA N.V. (BELGIUM), WYETH LEDERLE (Aprilia (LT) - Italy), PATHEON (Ferentino (FR) - e Monza - Italy), PATHEON (Bourgoin-Jallieu - FRANCE), PATHEON (Swindon - UK), ABOCA (San Sepolcro (PG) - Italy), CHEMI (Patrica (FR) - Italy), BSP (Latina Scalo (LT) - Italy), Sanofi-Aventis (Anagni (FR) - Italy).
